

Professional Photography Services

P-Tn [originally Photo-Technique] began as a general commercial photography business, but a three-decade-strong history of construction documentation photography and videotaping is only the foundation. Our photographers use an array of professional film and digital photo equipment and video gear ... we go where(ever) our clients need us, to handle industrial, aerial, architectural, and marketing photography assignments, and produce creative stock photos. We also have computer systems and the expertise to produce, mount, and frame your prints and enlargements.

P-Tn is all about professional service, personal and close communication between our staff and clients, plus great attention to detail.
